

Dear Neighbor,

Each year, we analyze the costs associated with new residential gas services for the previous three years and adjust charges to our customers. When we find savings, we pass those on to you. Please see below for changes to our free footage allowance and excess footage charge. These prices will go into effect March 1, 2024.

Free footage allowance included in the \$200 connection fee will decrease:

	Current	After March 1, 2024
Straight Gas Service	92 feet	88 feet
Joint Gas Service	138 feet	124 feet

Excess footage charge per foot after the footage allowance above:

	Current	After March 1, 2024
Residential	\$36.82	\$24.10
Non-Residential	\$47.01	\$30.03
Joint	\$29.23	\$19.55

These charges, in addition to upfront contributions, ensure we recover costs either through revenue over a 20-year period or upfront contributions.

If you need further assistance, including determining if your project qualifies as a typical residential service, please contact your Project Coordinator. We're grateful for the chance to work with you and look forward to talking soon.

Thank you,

Consumers Energy Customer Energy Management Team
